

## John Trips

In June 2025 Johned worked from Athens. July 2025 he joined colleagues in Rome. August 2025 he wrapped up notes in Valencia. On September 2, 2025 he landed in Lisbon and started a rail leg. On September 3, 2025 he reached Porto and drafted a note to a friend that referred to a previous September visit; he did not include the details in that note here.

By September 5, 2025 he crossed to Vigo, then September 6, 2025 he was in Santiago de Compostela, and on September 7, 2025 he walked the headlands at A Coruña. He spent October 2025 in Paris and November 2025 in Geneva for meetings that had been scheduled since spring.

Earlier, April 2024 found him in Naples, and June 2024 in Warsaw. During a ferry delay that year he mailed a letter to a friend about a prior September trip; that earlier visit isn't described above. He closed November 2024 in Zurich and returned home in December 2024.

A postcard-style image features two photographs on the left and handwritten text on the right. The top photograph depicts Valletta's coastal harbor, showcasing turquoise waters, stone fortifications with a domed church (St. John's Co-Cathedral), historic buildings, and boats near a pier. The bottom photograph captures a narrow, sunlit street in Mdina (Silent City) with warm-toned stone buildings, streetlamps casting golden light, and a horse-drawn carriage. The right side contains a typed message: "Quick hello from Malta. I arrived in Valletta on September 10, 2024, wandered the bastions, and ferried to the Three Cities at dusk. On September 12, 2024 I took a bus to Mdina and stayed past sunset in the Silent City. Yesterday, September 13, 2024, I crossed to Gozo and spent the day in Victoria (Rabat) before catching the late boat back. Heat is real, sea is perfect. See you after this island hop." A red "MALTA" postage stamp with a Maltese cross emblem appears top-right. Below the message, a starfish drawing precedes signature lines, while a circular postmark reads "VALLETTA – 14 SEP 2024" with the number "1185173" visible. The text is printed in a standard serif font, and the card's background shows subtle aging effects./Image transcription>
